

## International invasive ant management workshop

Announcing a three day workshop on the management of invasive ants to be held in Darwin, Australia on 27-29 April 2010. This focused workshop aims to facilitate networking among people involved in invasive ant management, as well as to improve the incorporation of research and ant biology into management.

The workshop will be hosted by CSIRO, with accommodation at the Mirambeena resort within Darwin city.

This workshop will be limited to 60 people due to restricted facility size.

As such, priority will be given to people who are actively involved in decision making and ground work of invasive ant management, especially eradication programs.

Participants will be expected to provide a brief (max. 5 minute) presentation of themselves and their work, and are also encouraged to propose a longer talk (15-20 minutes) of any aspect of invasive ant management that they deem of relevance to the workshop.

Details of this workshop are yet to be finalised, and more information will be provided as soon as possible. For planning purposes, the cost of the workshop will be under AU\$1500 per person, which includes accommodation.
