Subject: [KISC-L] Ag pest workshop

KISC and HDOA have organized an informal "agricultural pest workshop" to be held on December 11th at 0900. This workshop is open for anyone who is interested in learning more about the agricultural pests of Hawaii. This is a great opportunity to share information and have a collaborative effort against pests that affect us all. The workshop agenda is posted below. Please feel free to extend this invitation to anyone you know who might be interested in this topic. I will send out a reminder a week prior to the event. Look forward to seeing you there

Thank you,
Kristin Hall

Workshop Schedule:

Date: Monday, Dec 11th
Where: At HDOA in Lihue

From: 0900-1200

Presenters:

Craig Kaneshige - Will give an update of current agricultural pest on
Kauai, overview on what he and Eric
have been working on

Anthony Doth - give a talk about Citrus Greening

Richard Ebesu- Nettle Caterpillar

Neil Reimer- overview of the top ag pests in the state and
how KISC can help

Darcey Oishi - How to deal with inter island movement of
pests (especially with the super ferry coming)

Discussion: how can KISC and other resource conservation organizations assist in the control of these pests i.e. what we can do while we are out in the field.
