A Will Weinstein Summer Guest Speaker Presentation

Samantha Campbell

Jack Lemley

Murray Silverman

“Sustainable Development”

Thursday, July 19, 2007
6:00 – 7:45 p.m.

William S. Richardson School of Law
Classroom 2

Samantha Campbell runs a segment of the Campbell Foundation that is specifically dedicated to sustainability and environmental issues. She is a fiery and enthusiastic voice for the oceans and its inhabitants and is personally responsible for grants to environmentally progressive organizations of well in excess of \$1 million per year.

Jack Lemley is one of the most prominent people in the world of “international infrastructure construction.” He is a standout in the underground industrial construction field, having built the Chunnel between England and France. Until recently, he was Director of Construction of the London Olympics in 2012 and today consults for the New York Subway System, San Francisco BART System and a number of Middle Eastern countries who are presently building infrastructure. He is a very prestigious and articulate representative of the construction engineering industry.

Dr. Murray Silverman has been a professor in the college of business at San Francisco State University for more than twenty years. He is very well known for his teaching of environmentalism and sustainability. In addition to being an outstanding teacher, Murray is recognized as a thoughtful and insightful commentator on the “greening” of American industry.

This lecture is free of charge and seating is limited. Please RSVP acceptances only to the Shidler College of Business at (808) 956-6902 or e-mail busevent@hawaii.edu.
