To: Landscape & Golf Course Industry

While we had an excellent turnout for today's (10-11-08) Basamid & Pre-emergent Herbicide seminar, not many of you were able to see the research plots due to the rain.

Therefore, another field day will be held next week to allow you to see these plots on:

**Date:** December 17, 2008 (Wednesday)  
**Place:** Cooperative Extension Service, Bldg 214, Kahului (campus of Maui Community College)  
**Time:** 11:30 to 12:00 pm

**Registration Deadline is December 16.** You may respond to this email (nagatan@ctahr.hawaii.edu) or call the Cooperative Extension Service at 244-3242 x230 and leave a message with your name, company & telephone number. Registration will ensure that you will receive the color printed information on this project.
