

DNLR/DOFAW Brown Bag Seminar, Noon, Thursday Oct 15  
Kalanimoku Bldg, 1151 Punchbowl St, Room 131

**"The ontogeny of plant defense and herbivory: general patterns and possible case studies in Hawaii"**

**Kasey E. Barton**

Assistant Professor  
[Botany Department](#)  
[University of Hawai'i at Manoa](#)

Ph.D., University of Colorado at  
Boulder

Postdoctoral Fellow  
Natural Environment Research  
Council ([NERC](#))  
[School of Biological Sciences](#)  
[Royal Holloway, University of](#)  
[London](#)

Kasey is interested in the evolutionary ecology of plants/seed development and how plant traits are shaped by interactions with herbivores and neighboring plants. Specifically, Kasey is interested in the nature of these interactions and how they vary across plant life cycles. Her research should have many implications for Hawaii and she is looking forward to meeting the conservation community. Please join us in welcoming Kasey to Hawaii.
