

Learn About Ferns!

The Native Hawaiian Plant Society is sponsoring a special guest from Oahu to talk about native Hawaiian Ferns on Friday, Feb. 26, at 7 pm at the Hannibal Tavares Community Center Pool Room, Pukalani. Dr. Tom A. Ranker is a professor and Chair of Botany at the University of Hawaii and is an expert in Ferns and Lycophytes (primitive plants such as Wawae'iole), and author of many publications. This is a rare opportunity to learn about our many native ferns, which can be very tricky to differentiate and classify. Come and learn, and enjoy refreshments too!
