Environmental Educator, Hawaii Nature Center

Do you have passion for the outdoors and teaching others about it? This is the job for you! Spend your days outdoors while teaching children place-based environmental education programs.

Responsibilities: Teach groups of school children and/or families hands-on, place-based environmental education programs. Share your knowledge of Hawaii’s flora & fauna while leading groups on hikes, exploring the coast, or mud mucking in a wetland.

Qualifications: Ability to work in a team setting with enthusiasm and creativity and the desire to teach environmental education to school groups and weekend programs to families. Applicants must have obtained at least a sophomore standing in college and seeking a bachelors degree in Education, Natural Science, Biology, Environmental Education, or a related field. Preference will be given to applicants with training and/or experience in environmental education, natural resources or youth development as well as knowledge of Hawaii’s culture and unique ecosystems.

Must have an ability to work well with all ages (Pre-K through adult). Also, commitment, genuine interest in child development, dynamic personality, well-developed communication skills, creativity, and leadership ability.

Part Time: This is a part time position - 10-15 hour/week. You must be available to work weekends to be applicable for this position.

To Apply: Submit via email a resume, cover letter and three references to:
