Job Description

Title: Environmental Field Monitor

Location: Maui, Hawaii

Job Description:

Tetra Tech is hiring several qualified individuals for the position of Environmental Field Monitor to conduct biological monitoring during construction of a wind farm project in east Maui, Hawaii. The Monitor will be required to be onsite during certain periods of construction, primarily at night time, to monitor construction activities to avoid and minimize potential impacts to sea birds and other wildlife species of concern. The Monitor must be able to identify seabirds and other Maui wildlife species; work effectively with the construction contractor, owner, and Tetra Tech staff; and be able to, resolve situations that may require quick decision-making. The Monitor will work in a collaborative manner to monitor construction activities.

This position involves approximately 8 to 12 hour days monitoring the construction work area and equipment. This is an on-call, part-time, temporary contract position from mid-February through December 2012 (dates may vary depending on the construction schedule). The positions will be filled immediately. Preference given to individuals currently located on Maui or in Hawaii.

Job Duties and Responsibilities:

- Monitor wildlife species during wind farm construction;
- Maintain a daily compliance record;
- Provide periodic reports to Owner;
- Follow monitoring protocols;
- Communicate regularly with construction contractors and Tetra Tech staff;
- Use Trimble or Garmin GPS units to collect data.

Qualifications:

- BA/BS degree in Environmental Science, Biology, Environmental Engineering or Construction Management or commensurate field experience;
- Experience conducting construction monitoring for sea birds and other Hawaii wildlife species, preferable;
- Ability to record complete and accurate data;
- Ability to conduct fieldwork for long hours, in sometimes inclement weather conditions, and at night;
- A valid drivers’ license and 4-wheel drive vehicle.
