

Thinking Globally, Teaching Locally: Using the Hoike o Haleakala Curriculum to Teach Science as Inquiry

A free workshop for secondary school teachers

Benefits:

- Deepen your knowledge of Hawaiian natural history through field trips and classroom activities;
- Expand your methods for teaching science and become more adept at teaching science as inquiry;
- Explore a new Maui-based science/environmental education tool, the Hoike o Haleakala Curriculum, and discover new ways to use Hawaiian ecosystems as a basis for teaching scientific concepts;
- Assist with testing and evaluation of curriculum materials for revision and future development;
- Earn three professional development credits for participating (application pending).

When: August 2-6, 2004, 9am to 4pm

December 12, 2004, 9am to noon (follow-up/portfolio presentations)

Where: Maui Community College (exact location to be announced)

Registration Deadline: July 15, 2004

Contact Will Haines (UH National Science Foundation Graduate Teaching Fellow) at 808-956-9123 or whaines@hawaii.edu

Sponsors: University of Hawaii, Haleakala National Park, Maui Invasive Species Committee, and the United States Geological Survey
