Work update at Lawai infestation site

Upcoming control work will not be scheduled during the week of December 24, 2007.
Due to the Christmas holiday and crewmember vacations, work will not be performed at the site in Lawai during this week.

This past week the crew worked at the site spraying citric acid in section 13.
Herbicide was applied on guinea grass in section 5.
Lime was applied in section 6 and 7.
Occasional calling of maturing frogs can still be heard. We anticipated this happening and our work at the site focuses on targeting female and juvenile frogs by systematically spraying management units throughout the area.

Any reports of frogs, both at the site as well as in bordering areas, should be called into the Pest Hotline or directly to KISC so that we can follow up on it.

We hope that everyone has a safe holiday with many happy moments with friends and family!

Happy Holidays!

Report coqui frogs!
643-PEST

Management Area Map

The map to the left shows the entire infestation area. This area has been broken into management units, and numbered accordingly.

Work at the site will reference these numbers.

If you hear calling frogs in an area near you, please contact our office so that we can schedule treatment in that unit.

Happy Frog Holidays!
Contact Phone Numbers:
- KISC: 246-0684 (from 7:00 am to 4:00 pm)
- Crew Supervisor: 651-8781
- Hawaii Department of Agriculture: 274-3069
- Pest Hotline: 643-PEST
