**Kauai Invasive Species Committee**

Work Notification

November 23 - 27

## Work update at Lawai infestation site

Upcoming control work is scheduled to continue the week of **November 23, 2009**. Crews will be working during daylight hours and up until around 9:30 pm.

**The field crew work is scheduled for Monday and Tuesday of this week.**

This last week the crew was unable to work due to the weather.

This week the crew will continue with herbicide application on sections 14-16 and citric acid on sections 4, 16, 17 and wherever any calling frogs are heard.

Thanks go out to the Kauai Coqui Frog Working Group members who collaborate and assist with this project: Hawaii Department of Agriculture, College of Tropical Agriculture and Human Resources, DLNR-Division of Forestry and Wildlife, County of Kauai, Garden Island RC&D, Kukui'ula Development, A&B Properties, and Lawai Highland neighbors.

Coqui

Help keep Kaua'i Coqui-Free!

**Report coqui frogs!**

## Management Area Map

### Tidbit

The earliest known frog fossils to date were found in Arizona and are believed to be from the late Jurassic period, about 190 million years ago.

The difference between Greenhouse and Coqui frogs:

Characteristics	<b>GREENHOUSE FROG</b> <i>E. planirostris</i>	<b>PLEASE REPORT!</b> <b>COQUI FROG</b> <i>E. coqui</i> <b>PLEASE REPORT!</b>
<b>Body shape and size</b> (maximum adult length)	<ul style="list-style-type: none"> <li>&lt; 1 inch long</li> <li>Narrower body shape</li> </ul> <p>(not reportable)</p> 	<ul style="list-style-type: none"> <li>Slightly &gt; 1 inch long; adults about 1 1/2 times larger than greenhouse frogs</li> <li>Rounder body shape</li> </ul> 
<b>Color</b>	<ul style="list-style-type: none"> <li>Usually copper colored, mottled with black spots</li> <li>No mid-dorsal line (along back from nose to tail)</li> <li>Warty textured skin</li> </ul> 	<ul style="list-style-type: none"> <li>Greater variation in color, from light yellow to dark brown</li> <li>May be mottled with black spots</li> <li>Mid-dorsal line (stripe along back) may or may not be visible</li> </ul> 
<b>Shape of snout</b> (head portion in front of eyes)	<ul style="list-style-type: none"> <li>Narrower snout</li> </ul> 	<ul style="list-style-type: none"> <li>Broader, bow-shaped snout</li> </ul> 
<b>Toes and toe pads</b>	<ul style="list-style-type: none"> <li>Claw-like toes; toe pads not distinct</li> </ul> 	<ul style="list-style-type: none"> <li>Suction cup-like toe pads</li> </ul> 
<b>Male calling sounds</b>	<ul style="list-style-type: none"> <li>Soft, bird-like or cricket-like chirping</li> </ul>	<ul style="list-style-type: none"> <li>Loud two-tone call, "ko-kee"</li> </ul>
<b>Habitat</b>	<ul style="list-style-type: none"> <li>Exclusively on ground level</li> </ul>	<ul style="list-style-type: none"> <li>From ground level to tops of trees</li> </ul>
<b>Quarantine status</b>	<ul style="list-style-type: none"> <li>Not a quarantine pest</li> </ul>	<ul style="list-style-type: none"> <li>Only an inter-island quarantine pest</li> </ul>
