

PLEASE KOKUA

FOUNTAIN GRASS HAS INVADED YOUR NEIGHBOURHOOD!!

The Oahu Invasive Species Committee (OISC) is concerned with the spread of Fountain grass, an invasive grass from Africa that poses as a fire hazard and a threat to native species. Lanikai and Diamondhead are the only locations of large fountain grass populations. OISC wants to contain it to these areas, with focus on keeping it out of the Waianae mountains where it would cause devastating effects. Please help us keep Oahu from being taken over by this alien grass!

STOP THE SPREAD OF FOUNTAIN GRASS!
PLEASE CHECK AND REMOVE SEEDS FROM
YOUR BOOTS, CLOTHING, AND DOGS.

The Oahu Invasive Species Committee is an island-based grassroots partnerships of government agencies, private businesses and non-profit organizations working together to control or eradicate the worst pest species that threaten Oahu. **For more information call 286-4616.**
